The true value of rewards offers

These credit cards often highlight reward offers such as airline miles and merchandise that typically have specific requirements that may not meet your needs. Additional fees and higher rates for non-purchase transactions can increase the cost of using a rewards card and may cancel out the value of the rewards. If you have an excellent rating, Reliant's Visa Platinum credit card will provide you with the true value you are looking for.

The comparison at right, bottom, is for a borrower with an Excellent Credit Rating.
